Course Description

Technology is moving so rapidly and in so many directions that it becomes challenging to keep up. Companies must continue to evolve, or they would fall by the wayside. The relentless tide of technology cannot be ignored as it is changing the basis of competition, disrupting old business models and redefining industries.

This course aims to provide an overview of current trends in technologies, with a focus on major disruptive technologies such as Artificial Intelligence (AI), Virtual Assistant, Intelligent Automation, and Blockchain. Course attendees will also be introduced to Design Thinking, where they will get first-hand experience.

The course is conducted by technology experts and includes a tour of innovations showcasing how disruptive technologies can be harnessed in a hands-on experiential manner and most importantly, how they can be applied to business.

Course Objectives
